

FALCON WATERFREE **HPKV** VS. URIMAT **MB ACTIVE TRAP**  
**PRODUCT COMPARISON PERFORMANCE, MAINTENANCE & ODORS**

Falcon Waterfree Technologies is the plumbing industry leader in water conservation technology. For over 15 years, we have provided the world with the best, market-leading, patented urinal technologies. We are dedicated to understanding the our customers' needs and providing ever-evolving best in class technology to meet these needs.

Our new High Performance Key Valve (HPKV) is unlike any other dry valve in the market, helping to: eliminate restroom odors, provide the most robust flow rate, make maintenance and clean up easier, and provide a more hygienic solution in your restroom. With the HPKV we usher in the future of water conservation technology in the restroom.

**HEAD-TO-HEAD PRODUCT COMPARISON**  
**FALCON HPKV & URIMAT MB ACTIVE TRAP**  
**ODOR-PREVENTING TECHNOLOGY**

- Our HPKV cartridge features a patent-pending Bell Valve that contains ribs specifically designed to withstand pressure from the back migration of sewer gases.
- Our HPKV technology has undergone extensive third party and in-market testing with no observed performance issues.

**SUPERIOR DRAINAGE FLOW RATE**

- Our HPKV cartridge has shown an 8 times faster drainage flow rate compared to Urimat under internal testing, allowing us to convert flushing urinals to function waterfree with timed flushes for clean-out

**MAINTENANCE MADE EASY**

- Our Key Ring technology can be coupled with our HPKV cartridge to provide a visual cue indicating when to change out your cartridge.

## HOW IT WORKS FALCON HPKV CARTRIDGE

### Ribbed Bell Valve

Our HPKV features a **distinct patent-pending Bell Valve** with **internal ribs**.

When **liquids pass** through our Bell Valve the **valve deflects to open, snapping back** into place **when the liquids pass**.

The valve retains **excellent sealing against any sewer gas back migration**, helping to block out odor.

### MORE ROBUST TECHNOLOGY

Our patent-pending Bell Valve provides optimal performance for the duration of valve life span - resulting in better long term functionality for our customers.

### RETROFIT CAPABLE

Our **High Performance Key-Valve®** features a drastically faster flow capacity, creating a better user experience and allowing the valve to be used in urinals that flush on a timed basis without overflowing.

### 2X FASTER FLOW RATE

Our **High Performance Key-Valve®** technology provides more than twice the flow rate of competitor cartridges, see our testing report for full information.

SIGNIFICANT  
REDUCTION IN  
CO<sub>2</sub> FOOTPRINT

### CUES YOU WHEN TO REPLACE

Our patented Key-Ring® technology dissolves with use, providing a visual signal that helps you know when your cartridge needs to be changed, making maintenance easier.

## HOW IT WORKS URIMAT MB ACTIVE TRAP

### Vertically Sealing Membrane

The Urimat cartridge relies on an MB-ActiveCube to "reduce deposits and prevent inside odour" to help break down build up. However, they have provided no scientific research or evidence to support this claim.

Ongoing costs associated with the replacement of the MB-ActiveCube.

The Urimat valve features a vertically sealing membrane that has been tested to show remarkably slower flow rates, in fact 8 times slower, compared to our HPKV and other competitors.
